CALL YOUR DESTINY

Children's Dream Factory

The biggest discovery in the world is to find one's own way – one's own abilities and life-goals. Majority of the people just go on living without knowing their abilities and obligation in life. Each and every one of us has a unique obligation that we alone can carry out, because all human beings are different and unique. Going through the world history, we can clearly understand that each personality who re-wrote the world history was an utter failure before realizing his/her mission and obligation.

Most of us do not enjoy our work. We see many who lose their health and peace of mind by their occupation and becomes chronic patients. Lakhs of doctors and engineers come out of our colleges every year. But how many engineers make any change in the world order? How many doctors bring any new contribution to the medical field? Very few. How many professionals enjoy their work? 'Very few' is the answer here also. Why are we not able to enjoy our work? Boredom will

be a distant term when we are doing things that we love even for 24 hours, but we toil to complete even 8 hours in our work. Why is it so?

We will never feel bored if we work according to our real abilities and interests. In such a case, work will only increase our energy.

In order to fill our life with happiness and success, to make big changes in the world, we all should recognize our real ability and power. We should recognize our actual goal. One will not be a good doctor, if he had wished to be a footballer and was forced into the medical profession.

Howard Gardner talks about nine ways in which aptitude differs in each person. Each person can be a light for the world if his/her real interest is recognized and nurtured.

The Call to Your Destiny Programme conducted by the Benjali International includes scientific tests to find the real abilities inherent in a child. There is nothing valuable that a parent can do than recognizing the real abilities of his/her child and encouraging them. The Two Days' Intensive Workshop finds the abilities inherent in children and provides information and guidelines to build up a career based on their interest.

What you will learn from this Programme?

- ② What are the interests of a person?
- ② How can we know our aptitude/interest?
- ② What do we gain by recognizing and nurturing our aptitude/interest?
- ② How does aptitude help in success of life?
- ② How can we nurture our abilities?

Business Training and Wealth Coaching

Part -1 MILLIONAIRE CLUB Three Days Workshop

Wealth leads the world forward. Wealth is essential for beginning new industries, for the government to build new roads and bridges as well as for welfare programmes. It is needed for the building of places of worship and for running hospitals etc.

Only a very few ones desire not to have wealth. Even those who talk against a wealth and say there is no meaning in having wealth do wish to have wealth. Wealth is needed to carry out anything in life, be it having a desired life, owning the things we wish, travelling, buying a car or house etc.

95% of the wealth in the world is controlled by a mere 5% people. Why does this happen? While the rich grow richer, the majority of people toil under poverty or struggle to keep the two ends meet. Why can't everybody be rich?

Why can't many wins even after working hard or doing business to make money? What has to be done to solve financial problems? Even when two people do the same business, why only one wins and the other fails miserably?

The Mentality Called Wealthiness

Wealth is never a material thing, but rather it is a mentality close to our mind. Many who work from morning till midnight fail to make wealth because they do not have wealth in their minds. Because, they do not have the mindset of wealthiness to attract wealth to life.

Our circumstances form us. The things that we hear, see, know, learn and experience since childhood condition our mind. The conditioning of our mind decides our health, wealth and relations as well as the overview and success of life.

Our financial state is formed only by the financial blueprint in our mind which is developed by whatever we have heard, known and believed about wealth. A Person's financial blueprint will not be helpful to earn wealth if he/she has wrong thoughts as these – it is wrong to earn more wealth, there is no need to have more wealth but rather it's enough just to keep a minimal living, the rich are all bad and cunning, you can't sleep if you have a lot of wealth, it is very difficult to make wealth, etc. Those who have such a mindset will not be able to make wealth, how hard they work or how well they do business.

The Casac Benjali Millionaire Club Wealth Mastery Programme trains you to remove the hindrances in your mind in the way of creating wealth and to attract infinite wealth to your life. You get to attract more wealth to your life through your work and business by getting out of the limited convictions about wealth. The Programme also includes information about the new scopes of business worldwide as well as the new trends in technology along with how to manage wealth.

The Wealth Mastery Programme is helpful for those who desire to work for the goodness of the world especially by employing more people in their virtuous business organization and to be with what is the best for the society.

The importance of this training programme is its simplicity which makes it easy for you to apply the accelerated training programme in your life.

Part -2 BUSINESS LEADERSHIP Two Days Intensive Workshop

Your leader defines you. The world changes in time according to its leaders. The horizon of a country, society or a business establishment depends on the limitations of its leader. This explains why the same country or establishment varies in its gains and losses under different leaders. Leadership quality is present in each and every one, but only the area of influence varies based on the abilities of a person.

Are you a business person? Are you a person who leads the activities in an organization? Are you a social or political activist? If so, you must understand about leadership. You should realize that leadership ability is something that can be improved.

Only a very few are born as leaders. Some people exhibit the leadership ability since childhood, while others become leaders due to their circumstances. Each one of us is a leader in our home, business, workplace or society. We have to take out our leadership abilities in every field. But majority of people believe that leadership ability cannot be created or achieved.

If you are a business person, the growth of your business will be one point below your leadership ability. For example, if your leadership ability can be counted as 7 points, your business growth will be 5 or 6, and never 8 or 9. This will be the case whether the field is social or political or anything else. Your power of influence as a leader will always be below your leadership capability.

If you want to expand your business to a higher level, if you want to increase the number of branches of your business establishment, then the first step to be taken is to improve your leadership capability. We have seen instances where a successfully running business fails and has to shut down on opening a new branch. The main reason for this is the inability to run two business establishments with the existing leadership ability. At the same time, we also see others who run hundreds of business establishments successfully at the same time.

Can we improve our leadership ability?

Of course, leadership too is an ability that can be improved by gaining knowledge and through systematic training just like any other ability. Kingdom of Leadership by Benjali international is a training programme rich in practical techniques and research samples which helps you to improve the leadership ability inherent in you to the desired way. This programme helps you bag wonderful achievements in your business and socio-political influence by improving your leadership ability.

You become a real leader only when your business and activities move towards success even in your absence. And that is the real leadership success. The Kingdom of Business Leadership Programme helps you to achieve the secrets for the

same.
